## About

---

Experienced senior leader, statistician, and privacy professional with expertise in federal privacy and confidentiality laws and statistical disclosure limitation (de-identification).

## Experience

---

### **U.S. Census Bureau**, Senior Survey Statistician for Scientific Communication (ST-1530-00)

*Suitland, MD*  
2022 — present

- Responsible for research and development relating to scientific communication about agency initiatives and on issues relating to the development, access, management, quality, and confidentiality of Census Bureau data and statistical products.
- Advises agency senior leadership on improving technical communication to scientific journals, government officials, agency partners, media, data users, and other stakeholders, spanning the fields of statistics, computer science, survey methodology, demography, political science, sociology, health, economics, and other sciences.

### **U.S. Census Bureau**, Senior Advisor for Data Access and Privacy (GS-1530-15)

*Suitland, MD*  
1999 — 2022

- Advised agency senior leadership on technical and strategic challenges relating to statistical disclosure limitation, data governance, and data access.
- Conducted outreach and strategic communication with internal and external data users about the impact of statistical disclosure limitation modernization on the availability and usability of Census data.
- Drafted educational materials for diverse technical and non-technical audiences on differential privacy and the 2020 Census Disclosure Avoidance System, including the motivations for modernizing statistical disclosure limitation for the 2020 Census, the design and implementation of the system's TopDown Algorithm, and empirical disclosure risk assessments of data treated with different methods and levels of statistical disclosure limitation.
- Conducted 200+ briefings for federal advisory committees; Congressional members and staff; federal, state, and local officials; American Indian and Alaska Native tribal leaders; professional associations; and stakeholder interest groups.

### **U.S. Department of Education**, Director of Student Privacy Policy (GS-0343-15)

*Washington, DC*  
2016 – 2019

- Served as the senior regulator, policy advisor, and administrator for the Family Educational Rights and Privacy Act (FERPA) and the Protection of Pupil Rights Amendment (PPRA).
- Implemented organizational and procedural changes to reduce the longstanding enforcement backlog by over 50%.
- Managed the Department's provision of technical assistance to state and local governments on issues relating to student privacy.
- Developed and published over 70 major regulatory and technical assistance resources, and resolved over 16,000 technical assistance inquiries from federal, state, and local officials and stakeholders.
- Oversaw the delivery of 80+ (per year) legal and technical briefings, site visits, regional meetings, and presentations for federal agencies, state and local government officials, professional associations, private industry, and stakeholder groups.
- Managed the Department of Education's Disclosure Review Board, responsible for reviewing and approving the application of statistical disclosure limitation methodologies on Department of Education data releases and helped coordinate the Depart-

ment's broader data governance efforts through the Data Strategy Team.

**U.S. Department of Education**, Statistical Privacy Advisor (GS-1530-14)

Washington, DC  
2011 – 2016

- Advised the Chief Privacy Officer and senior leadership on issues relating to data governance, privacy, and statistical disclosure limitation.
- Established and chaired the Department of Education's Disclosure Review Board (ED-DRB), responsible for reviewing and approving the application of statistical disclosure limitation methodologies on Department of Education data releases. The ED-DRB was the first governance board of its type by a non-statistical federal agency and has been widely recognized across government as a best-practice model of effective data governance.
- Managed the Department of Education's Privacy Technical Assistance Center.
- Conducted regular technical assistance briefings, site visits, regional meetings, and presentations for federal agencies, state and local government officials, professional associations, private industry, and stakeholder groups.

**Commission on Evidence-Based Policymaking**, Privacy Consultant (Part-time detail)

Washington, DC  
2016 – 2017

- Advised the Commissioners and Commission staff on federal privacy laws relating to the safeguarding, use, and disclosure of data.
- Assisted in the drafting and review of the Commission's final report, *The Promise of Evidence-based Policymaking* [↗](#).

**U.S. Census Bureau**, Statistician/Policy Analyst (GS-1530-12/GS-0301-13)

Suitland, MD  
2008 – 2011

- Served as lead policy analyst for the Policy Coordination Office, providing expert review, opinion, and documentation on policy matters.

**Georgetown University**, Visiting Faculty  
Department of Government and Edmund A. Walsh School of Foreign Service

Washington, DC  
2005 – 2007

- Taught undergraduate and graduate courses with 5-150 students on international relations, U.S. foreign policy, and formal research methods.

## **Selected Regulatory Publications** *(Out of over 70 published from 2014 – 2019)*

---

### **Improving the Effectiveness and Efficiency of FERPA Enforcement** [↗](#)

U.S. Department of Education, Office of the Chief Privacy Officer (December 2018).

- Designated as “Significant Guidance” under the Office of Management and Budget’s Final Bulletin for Agency Good Guidance Practices, this publication established a new paradigm for investigation and enforcement of formal complaints under the Family Educational Rights and Privacy Act (FERPA), and implemented new mechanisms for mediation and technical assistance in order to expedite resolution of student and parent concerns.

### **Letter to Wachter (Disclosure of Surveillance Video of Multiple Students)** [↗](#)

U.S. Department of Education, Office of the Chief Privacy Officer (December 2017).

- Because the physical likeness of an individual is typically considered personally identifiable information, there was longstanding uncertainty regarding when an educational institution could legally share photos or videos that showed multiple students (e.g., a video that shows the crowd at a school basketball game) vs. when the school had a legal obligation to protect that video against disclosure (e.g., a hallway surveillance video that shows a student having a medical emergency amid bystanders). This publication, and the related [FAQs on Photos and Videos under FERPA](#) [↗](#) provided much needed legal clarification of these requirements, with implications for school safety, law enforcement, and privacy.

### **Integrated Data Systems and Student Privacy** [↗](#)

U.S. Department of Education, Privacy Technical Assistance Center (January 2017).

- The Family Educational Rights and Privacy Act provides mechanisms for educational agencies and authorities to share data with other state and local agencies for program evaluation and research, but in spite of the overall value that these integrated data repositories can provide, the legal and policy complexities associated with establishing a statewide longitudinal data system or county/municipal integrated data system often impede their creation. This publication clarified the legal framework under which an integrated data system can be established, and provided best practices for establishing them in a manner that promotes appropriate and responsible use of student data while also ensuring that privacy is properly safeguarded.

### **Guidance on the Use of Financial Aid Information for Program Evaluation and Research** [↗](#)

U.S. Department of Education, Privacy Technical Assistance Center (January 2017).

- The information contained in student financial aid records is invaluable for research and program evaluation regarding the impact of demographic and economic factors on students’ post-secondary educational achievement and subsequent career success. These financial aid records are protected under multiple federal laws, each with differing provisions regarding data access and use. This publication was the first-ever to clarify how these multiple laws intersect in the context of using financial aid data for program evaluation and research.

### **Response to Louisiana (Disclosure Avoidance)** [↗](#)

U.S. Department of Education, Office of Management (April 2016).

- This publication clarified that state departments of education are required to assess the risk of disclosure in the aggregate statistics they publish, and to perform statistical disclosure limitation whenever that risk of disclosure exceeds the “reasonable person” threshold established under the Family Educational Rights and Privacy Act.

### **Protecting Student Privacy While Using Online Educational Services: Requirements and Best Practices** [↗](#)

U.S. Department of Education, Privacy Technical Assistance Center (February 2014).

- In 1974, when the Family Education Rights and Privacy Act was enacted, students’ education records were typically paper records stored in the school’s front office. Over the subsequent decades, cloud providers replaced filing cabinets, learning management systems replaced teacher gradebooks, and online apps and services replaced handouts and worksheets. This guidance provided the first ever clarification of how FERPA applies in the online educational services context, and identified best practices that schools and technology companies should follow to ensure student privacy.
